***Election/Restrictions***

1. Applicant's election without traverse of Group I, claims 1-11 in the reply filed on 2/23/2008 is acknowledged. However, this application further contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. Restriction is required under 35 U.S.C. 121 and 372. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, drawn to a method of making a wheel rim from a plate-like blank including steps of curving and forming a hollow cylindrical body, recess, curled and hump portions.

Group II, claim(s) 7-11, drawn to a method of manufacturing a wheel rim including step of providing protrusions disposed near ends of a joined areas.

The invention listed as Groups I & II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I requires the steps of curving, forming a hollow cylindrical body, forming curled portions, and forming hump portions, which is not required by Group II. Group II requires a step of providing protrusions disposed near ends of a joined area of an already formed hollow cylindrical body.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 3726

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
